Hot Fat Depth Limiter

For Whizard[®] Quantum[®] and Whizard[®] Series II Model 1300 Trimmers

Bettcher introduces the Hot Fat Depth Limiter for removing beef fat in slaughtering operations.

Remove the Fat – Not the Lean

Conventional hot fat removal techniques often take away lean along with the fat, adversely affecting yield results. The **Hot Fat Depth Limiter** solves that problem by controlling depth from the lean surface up to the blade rather than from the fat surface.

Make a Measurable Difference

With the Hot Fat Depth Limiter, making multiple “passes” with the blade won’t affect the predetermined fat coverage depth, which makes it easier to ensure that just the fat – and not the lean – is being removed.

The tool’s functionality allows for maximum adjustability during the fat removal process. Height is adjustable ... the wheels spread in the direction of travel ... and the entire depth gauge can rotate 90 degrees so that the operator can hold the trimmer in the most suitable position for the application.

Universal Attachment

The Hot Fat Depth Limiter is a universal tool that attaches easily to both Whizard Quantum and Whizard Series II Model 1300 Trimmers. With the Hot Fat Depth Limiter, you’ll be improving your product yields – and plant profits – from Day 1.

- Removes beef fat without penetrating lean meat
- Improves product yields
- Simple to operate
- Attaches easily to Whizard Quantum[®] and Whizard[®] Series II Model 1300 Trimmers

Hot Fat Depth Limiter – Product Specifications

Models Used

- Whizard Quantum and Whizard Series II Model 1300 Trimmers

Wheel Spacing

- 2" adjustment (5.1 cm)

Gauge Mounting

- 90° increments

Height

- Adjustable

Weight

- 17.5 oz (496.1 gm)

Part Number

- 104192
