

New!

AirShirz[®] Angled Blades

For Poultry "Pistol Grip" Cutting Operations

Bettcher introduces a new engineered blade for its industry-leading AirShirz[®] pneumatic scissors that makes quick and easy work of poultry processing applications requiring a pistol grip action. This new blade takes difficult, unwieldy and fatiguing procedures and turns them into a snap!

The Right Angle on Accuracy

The key to this new blade's powerful functionality is its angled design and construction. The 30-degree angle makes our standard scissor grip orientation more like a pistol grip, enabling flexibility in how AirShirz are used in your processing operations.

No More "Venting" About Cutting

As just one example of how AirShirz angled blades are your best ally on poultry processing lines, they're perfect for vent-opening procedures when cuts are made to birds hanging on shackles. The vent cuts are quick, clean and precise – each and every time.

You get better productivity through less hand stress, too, with a 90% reduction in hand force.

As with all other AirShirz blades, the angled blades are removable for easy sharpening. What's more, their rugged stainless steel construction provides long-life blade durability that's second to none.

- **Makes quick work of challenging cutting applications like poultry vent opening procedures**
- **Super-clean, super-accurate cutting**
- **Long-life blade durability**

AIRSHIRZ[®]

Angled Blade for AirShirz® Pneumatic Scissors – Model 105049

Product Specifications

Using a 30 degree angled blade on AirShirz® pneumatic scissors allows for a “pistol grip” orientation, making cutting procedures easier for certain processing operations such as vent opening of birds on shackles.

Blade

- 30° angled blade
- Fits AirShirz® and AirShirz® Magnum Pneumatic Scissors
- Part Number: 105049

EdgeKing® Scissors Sharpener – *for all your scissor sharpening needs*

- Sharpener Assembly 115 V
(Part Number: 108284)
- Sharpener Assembly 230V
(Part Number: 108442)
