

## Completely Disassemble and Clean

### WARNING!

Sharp blades may cause cut injury! Keep hands away from blades! For proper protection of hands, protective cut resistant gloves should be used when cleaning equipment and during the handling of the blades.

- 1. Rinse:** Immediately after use.

- 2. Soak:** Use 2 oz per gallon of Extra Cleaner of warm water ... soak for 30 minutes.

Case Part  
#184331

- 3. Clean:**

- 4. Clean Handle and Frame:**

Remove handle and clean all surfaces of handle and frame.

- 5. Rinse:** Rinse and dry all cleaned parts.

### Blade Wear Gauge

To test blade wear, simply drop a blade into the gauge. Replace any blade that passes through the gauge.
