BETTCHER Ergo Steel™ Edge Maintenance Tool

The fast, easy way to restore blade edges to razor-sharp performance.

The Bettcher Ergo Steel™ edge maintenance tool restores sharp blade edges in just seconds – right on the production floor. It's so easy to use, it requires no operator training!

- Fits comfortably and safely for easy right- or left-hand operation
- Also designed for bench-mounted use

With its stainless steel construction and smooth electropolished finish, the Bettcher Ergo Steel resists product adhesion and buildup, too, making cleaning easier and more thorough.

EDGE MAINTENANCE TOOL

How It Works

- Two specially engineered flexible stainless steel alignment rods pivot on a compact base.
- A spring mechanism provides the ideal amount of tension between the blade edge and the rods.
- Both sides of the blade are straightened simultaneously, resulting in a perfect cutting edge in just seconds.

To find out more about the powerful benefits of the Bettcher Ergo Steel edge maintenance tool, visit bettcher.com/ergosteel or call **800-321-8763**.
