

## Head of the Class

*The world's most productive and powerful trimmer system delivers dramatic yield improvements in pork cheeking operations.*

### ► How effective is the Quantum™ Trimmer System?

If you're talking about increased meat yields and a rapid ROI ... you're talking *dramatically* more effective!

A large Mid-Continent U.S. pork processing plant tested Quantum™ Q750 Trimmers with a continuous cutting edge for pork head cheeking operations – recovering cheek meat from the skull after the jawbone has been removed. Compared to its older-technology trimmers as well as straight knives, the results weren't a head-scratcher!

#### Average Meat Comparison

(Meat yield per pork head)

Straight knife:	0.4277 lbs.
Existing Trimmers:	0.4752 lbs. (+ 0.0470 lbs. yield gain over straight knife)
<b>Quantum™ Trimmers:</b>	<b>0.5165 lbs. (+ 0.0888 lbs. yield gain over straight knife)</b>

- Yield gain over straight knife: **+18%**
- Yield gain over older model trimmers: **+8%**

For this processor, the decision to switch to the Quantum Trimmer System was easy:

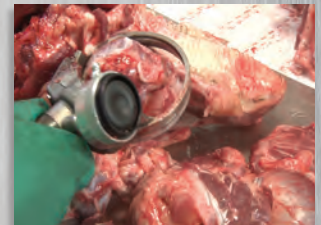

- Significantly better yields
- More worker productivity
- Quick ROI
- Lowest long-term cost of operation
- Improved bottom-line performance

### ► We can improve your meat yields and profits, too!

Let's explore how we can help you achieve similarly strong results in your meat processing operations. Contact us today for an in-plant demonstration and custom financial impact analysis.

## We've improved everything about trimming ...

*The Quantum® Trimmer System:*

- Makes even the toughest cuts easy
- Delivers better productivity and meat yields
- Reduces parts, maintenance and training
- Delivers the lowest long-term cost of operation

That's Quantum – brought to you by the world's trimming leader and based on years of research and rigorous field testing.
