

Universal Blade Sharpener Model 210

Precision Sharpening for Whizard® trimmer blades.

The Bettcher Universal Model 210 lets you sharpen Whizard® blades quickly and accurately with consistent sharpness time after time.

Regular sharpening of your Whizard blades results in higher yields, longer blade life, and more consistent operator performance.

With its universal design, unique sharpening wheel, and precision steeling devices, the Model 210 turns dull blades into fine cutting tools in just seconds.

The Model 210 is easy to use, too. All that's required is a screwdriver to open and close the blade-holding mechanism, a simple positioning of the wheel, and insertion of the proper steel. That's all there is to it!

The blade is held firmly in place so the sharpening wheel and steel can precisely duplicate the original factory edge. There's never any guesswork. Your maintenance department will sharpen Whizard blades, including TrimVac blades, with greater speed and accuracy than ever before!

Universal Whizard® Blade Sharpener shown with optional blade holder and a serrated blade.

Simple Sharpening Wheel Adjustments: Simple instructions for proper wheel setting for each blade eliminates guesswork.

Precision Sharpening Wheel: Correctly sharpens all Whizard blade types, never needs dressing and outlasts other sharpening stones.

Properly Secure Blades and Accurate Steeling: There is a blade holder and steel for each type and size of blade.

Performance Features:

- Blades are held in the exact position for sharpening.
- Easy-to-use. No special tools needed.
- Converts quickly to sharpen any Bettcher Whizard blade.
- Precision sharpening wheel assures an accurate, sharp edge every time. Durable CBN coating lasts much longer than ordinary wheels. Never needs dressing.
- Steeling device is precisely aligned for deburring for all Bettcher Whizard blades. Repeatable results without any guesswork!
- Simple operation makes sharpening Whizard blades quick, easy and flawless.
- Compact design requires very little bench space.
- Stainless steel construction resists rust and corrosion.

Simple, straight forward design makes it easy to restore any Whizard Trimmer blade to its factory sharp edge.
